

*Dear Child Care Commission,*

Here are my thoughts on some of the proposed rule changes:

Rule .2502 Licensing of Track Out programs

I agree that Track-out programs operating TWO or more tracks should be required to be licensed.

Rule .0802 Annual Update of Child’s Emergency Medical Information

I agree communication between parents and providers about a child’s emergency medical care information should be frequent, and should be accomplished without adding a labor-intensive rule that will add to the paperwork burden of providers.

Rule .0501 Staff/Child Interactions

I agree we should find ways to incorporate knowledge of best practices with staff/child interactions without adding a duplicative rule that will be extremely difficult to measure and quantify.

Rule .0510 Maximums for Screen Time

I agree we should increase awareness of screen time without adding a duplicative rule that is difficult to monitor.

Rules .0508 and .0509 Outdoor Play Minimum Times

I agree we should encourage more outdoor play without adding an unclear, duplicative rule that will be difficult to interpret, and I agree we need a universal definition of “weather permitting.”
